According to the WEF, a new one world religion has arrived and it unites all of humanity in worshipping at the altar of climate science, techno-communism and eugenics. If you find it hard to believe Klaus Schwab's WEF would go this far, you clearly haven't been paying attention to developments in recent times. Klaus Schwab's right hand man Yuval Noah Harari has announced that the WEF has been so successful in its plans that it is "acquiring divine powers" of "creation and destruction." We all know that central bank digital currencies are bad news. But do you know the difference between retail and wholesale CBDCs? Today...begins introducing you to the split circuit monetary system as we dive deeper down the programmable money rabbit hole."

[Liberty and Finance: Prepare for Reset, Digital Dollar is a Drill \(w/ Francis Hunt\)](#)

Our guest today is Francis Hunt, The Market Sniper. In the recent shutdown of the FTX cryptocurrency exchange, he lost funds in the debacle. "We've scenario costs and thought through how things break down, and still I got nabbed. Take a

lesson from me,” he says, “There is real counter party risk.” He says the collapse of the FTX exchange is simply a microcosm of what is to come for the greater financial system. Digital assets are at extreme risk, he says.

The rollout of the Digital Dollar is a not a “test” but more like a military drill, he says. A monetary reset is coming. Everyone should prepare by holding physical assets like precious metals, he says. “Holding your wealth is 9/10 of the law.”
